

Fascette stringitubo W2 - 9/12 mm

Hose Clamps W2 - 9/12 mm

BANDA PIENA

La fascetta stringitubo è realizzata con anello a cremagliera stampata e bordi arrotondati per evitare danneggiamenti al tubo, con cassetto lungo in cui alloggia una vite di maggiori dimensioni. Il maggior numero di filetti della vite in presa sulla cremagliera del nastro garantisce migliori prestazioni nel serraggio rendendo questa fascetta adatta a tutte le applicazioni industriali con elevate esigenze di montaggio.

Nel punto di aggiraffaggio all'anello il cassetto mantiene dimensioni ridotte per favorire flessibilità nell'adattamento alla circonferenza del tubo.

The clamp is manufactured by a threaded band pressed and rounded edges to prevent damages to the pipe, with a larger screw housing and larger screw fixture. The increased number of screw threads ensure greater grip and torque making this clamp ideal for demanding industrial assembly requirements. To ensure greater flexibility and adaptability to the hose the screw housing mounted on the band in the clamping point has been designed maintaining a reduced overall size.
